Creative Solutions for your compliance burdens

Comprehensive Safety and Compliance Manual — Available in Industrial, Institutional, Commercial or Construction Versions

This complete safety management and compliance program establishes a framework for the organization and formation of safety committees, safety meetings, and injury/illness prevention, required for participation in OSHA VPP and Ohio BWC 10-Step programs. It is presented as two separate volumes: A Safety Management Manual and a Safety Compliance Manual.

The Safety Management Manual contains easy-to-follow implementation guidelines for your OSHA programs and an effective safety management process to reduce injuries and illnesses. Chapters include:

- Safety Management Concepts;
- Employee Safety Contacts;
- Supervisory Safety Performance;
- Fitness for Duty Program;
- Design and Inspection of New and Rebuilt Equipment;
- Recordkeeping and Data Analysis;
- Fire Prevention and Protection;
- Ergonomics;
- Utility Identification;
- Incident Investigation Procedures, and
- Outside Contractors

The Safety Compliance Manual includes basic policies and procedures, plus sections on safe practices for:

- Office and Warehouse;
- Vehicle Fleet and Driver;
- Material Handling/Lifting;
- Forklift, Crane/Hoist/Slings, and
- Hand/Power Tools.

It can include any of the previously listed OSHA, and most of the following EPA Programs. ***Up to four customized programs are included in the basic price.*** Choose additional programs at the discounted price of \$250.00 each.

Price for the basic Safety Management Manual and Safety Compliance Manual, with up to four customized OSHA/EPA compliance programs. \$1,345.00

Add \$250.00 for each additional compliance program you need, except Chemical Emergency Preparedness, SPCC Plan, or Stormwater Pollution Prevention Plan.

Note: Price above excludes lock-out survey/procedures, confined space inventory, chemical emergency procedures, SPCC and stormwater procedures.
