

# The Dell Group, Inc.

*Creative* Solutions for your compliance burdens

## MSDS Review

Chemical Product Inventory - Perform physical inventory of all potentially "hazardous" chemical products, at the Cleveland facility only. Provide both hard copy and diskette database version to ease client update procedure. For no additional charge the inventory will include an analysis of label hazard warning adequacy. Recommend disposal and consolidation of obsolete products. . . . .Call for Quotation

Collect missing Material Safety Data Sheets - Collect MSDS for chemical products in present inventory or document three due diligence attempts on each product. . . . .  
. . . . .Call for Quotation

Review, reorganize and update present MSDS collection for current, obsolete, and missing MSDSheets. . . . . Call for Quotation

Hazard Determination Report - Determine exact OSHA defined physical and health hazards presented by the chemical products. Provides the foundation for design and documentation of employee training programs, and determination of community right-to-know reporting obligation. . . . . Call for Quotation
