Creative Solutions for your compliance burdens

Respiratory Protection and Air Monitoring Workshop

This special workshop is designed for employers who are faced with protecting workers from air contaminants in industrial, institutional or construction settings. You will be provided with an understanding of the basic tools to evaluate and control atmospheric hazards such as toxics, corrosives, irritants, asphyxiants, and oxygen deficiency.

Covers respiratory hazards and protective measures, hazard control methods, OSHA's Respirator Standard, permissible exposure limits, and air sampling techniques. Perfect for plant or construction managers, human resources, or maintenance supervisors and small business owners.

What You Will Learn

Atmospheric Hazards;

Evaluation and Control;

Types of Respirators and Fit Testing Options;

OSHA's New Respiratory Protection Standard;

Air Monitoring Concepts;

Direct Reading Instruments, and

Personal Sampling and Analysis Methods Including Hands-on Workshop.

Price

Your location: \$1,050.00 per session, plus \$20.00 per trainee for textbooks and handouts
